

Consumer price indices: provisional data

September 2012

The Consumer Price Index measures the change in prices over time of a set of goods and services (CPI basket) representative of Italian household consumption.

Istat estimates that in September 2012:

- the National Consumer Price Index for the whole nation **CPI** (see Italian **NIC**) – used to measure inflation over the entire Italian economic system – held steady compared to the previous month and rose by 3.2% in comparison to the same month of the previous year;
- the EU Harmonized Index of Consumer Prices **HICP** (see Italian **IPCA**) – developed to facilitate the comparison of inflation between Member States – rose by 2.1% compared to the previous month and by 3.4% in comparison to the same month of the previous year.
