

## Job vacancy rate in industry and services

*III quarter 2012*

A job vacancy is a paid post which can be newly created, unoccupied or about to become vacant, for which the employer is taking active steps and is prepared to take further steps to find a suitable candidate from outside the enterprise concerned.

The job vacancy rate is the percentage ratio between vacancies and the sum of vacancies and occupied posts (both measured at the end of the reference quarter).

In the third quarter of 2012 the job vacancy rate for the total of sectors covered by the survey (industry and services) was 0.5%, with a 0.2 percentage points decrease with respect to the third quarter of 2011.

### Job vacancy rate in industry and services. III quarter 2012

	Job vacancy rate (percentage) III 2012	Absolute change on the same quarter of the previous year (percentage points) III 2012/III 2011
Industry (a)	0.4	-0.2
Services (b)	0.5	-0.3
Total	0.5	-0.2

Preliminary estimates.

(a) Including mining, manufacturing, electricity, gas and water supply, construction (sections B-F of NACE rev. 2 classification of economic activities).

(b) Private services excluding health, education and non-market services (sections G-N of NACE rev. 2 classification of economic activities).
