

## Industrial production

November 2012

The index measures the monthly evolution of the volume of industrial production (excluding construction). Since January 2009 the indices have been calculated with reference to the base year 2005 using the new Ateco 2007 classification (Italian edition of Nace Rev. 2).

In November 2012 the industrial production index seasonally adjusted decreased by 1.0% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was -1.7%.

The calendar adjusted industrial production index decreased by 7.6% compared with November 2011 (calendar working days in November 2012 being the same as in November 2011); in the period January- November 2012 the percentage change was -6.6 compared with the same period of 2011.

The unadjusted index of industrial production decreased by 7.6% compared with November 2011.

**Indices of industrial production** (a). November 2012 (b)

Indices	Index (2005=100)	Percentage changes on the previous period		Percentage changes on the same period of the previous year	
		Nov 12	Sep 12-Nov 12	Nov 12	Jan-Nov 12
		Oct 12	Jun 12-Aug 12	Nov 11	Jan-Nov 11
Industrial production seasonally adjusted	80.8	-1.0	-1.7	-	-
Industrial production calendar adjusted	84.4	-	-	-7.6	-6.6
Industrial production not adjusted	85.4	-	-	-7.6	-5.9
<i>Calendar working days</i>	21				

(a) Excluding construction.

(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises; up until 2010 further revisions have been published every six months (on occasion of the press release of April and October). Since 2011 data are revised with a yearly occurrence on occasion of the press release of April.
