Industrial production

January 2014

The index measures the monthly evolution of the volume of industrial production (excluding construction). With effect from January 2013 the indices are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In January 2014 the industrial production index seasonally adjusted increased by 1.0% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was +0.7.

The calendar adjusted industrial production index increased by 1.4% compared with January 2013 (calendar working days in January 2014 being 21 versus 22 days in January 2013).

The unadjusted index of industrial production decreased by 1.7% compared with January 2013.

Indices of industrial production (a). January 2014 (b)

	Index (2010=100)	Percentage changes		
		Jan 14 / Dec 13	Nov 13 - Jan 14 / Aug - Oct 13	Jan 14 / Jan 13
Industrial production seasonally adjusted	92.6	+1.0	+0.7	-
Industrial production calendar adjusted	87.2	-	-	+1.4
Industrial production unadjusted	87.5	-	-	-1.7
Calendar working days	*21*			

(a) Excluding construction.
(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises; up until 2010 further revisions have been published every six months (on occasion of the press release of April and October). Since 2011 data are revised with a yearly occurrence on occasion of the press release of April.
