

Mapping of data collection and analytical capacity on asylum in Italy

Chiara Impagliazzo | Ministry of Interiors

A detailed overview of asylum-related data collection and its use in Italy. Identification of the main stakeholders in the practical functioning of the national asylum system, description of the data collected at each stage of the process, including its format and management, and the links between stakeholders and the exchange and use of information and data.

The overview will be done using the most recent data on the asylum application in Italy and also in comparison with the European+ situation
