

Istituto Nazionale di Statistica

# Censimento PERMANENTE della popolazione e delle abitazioni

## THE CENSUS OF THE FUTURE BEGINS HERE

Italy's National Institute of Statistics (Istituto nazionale di statistica) has begun the trial phase of the **Permanent Population Census**, which aims to collect data and information at a detailed territorial level yearly instead of every ten years, by combining information derived from administrative sources and from small-sized statistical surveys.

In line with European and national regulations, the Permanent Census is an important operation for verifying, with greater timeliness, how many persons usually reside in the municipalities, and for gathering useful information for a more efficient programming of social and economic policies.

**The National Institute of Statistics is requesting the cooperation of all Italian citizens and foreign people who live in this building.**

On \_\_\_\_\_(date), the enumerator appointed by your Municipality  
\_\_\_\_\_(enumerator's name) carrying an  
identification card, will visit to provide explanations and conduct the interview using a tablet or  
laptop.

To schedule an appointment for the interview or receive clarifications, please call the Municipal  
Survey Office \_\_\_\_\_(office number) or  
directly the enumerator \_\_\_\_\_(personal number).

**Your full cooperation is kindly requested in order to guarantee success to this survey, that is in your own interest and in that of the society as a whole.**

For any other request for information, Istat's **toll-free number 800.13.94.00** will be active starting 13 April, Monday through Friday from 8:30 AM to 5:00 PM, excluding holidays.

We thank you in advance for your valuable cooperation.
