

Quarterly turnover in other services

III quarter 2010

Indices of turnover in other services measure the quarterly change recorded in sales, at current prices, by firms belonging to a subset of the entire domain. Since the first quarter of 2009 the indices have been calculated with reference to the base year 2005 using the new Ateco 2007 classification (Italian edition of Nace Rev. 2).

In the third quarter of 2010, compared with the previous quarter, the seasonally adjusted index of turnover has recorded an increase for Air transport (2.9%), Wholesale trade (1.3%) and Water transport (0.3%). A slight decrease has been recorded in turnover of Postal and courier activities (-0.9%), Information and communication (-0.4%) and Maintenance and repair of motor vehicles (-0.2%).

Compared to the same quarter of 2009 the turnover index has shown a general increase in almost all sectors: the biggest growth has occurred in Water transport (16.0%), in Wholesale trade (7.0%), Air transport (5.8%) and Maintenance and repair of motor vehicles (3.5%). The only decrease has been registered in Postal and courier activities (-1.4%).
