

## Contractual wages and salaries

*March 2013*

The index of wages according to collective labour agreements measures the evolution of wages and salaries (per employee or per hour) determined by contractual provisions set by collective agreements; the indices are calculated with reference to the fixed employment structure of the base period (December 2010).

At the end of March 2013 the coverage rate (share of national collective agreements in force for the wage setting aspects) was 59.2 per cent in terms of employees and 55.7 per cent in terms of the total amount of wages.

In March 2013 both the hourly wage index and the per employee index were unchanged compared to the previous month. Compared with March 2012 both the hourly wage index and the per employee index increased by 1.4 per cent. During the period January- March 2013 both indices increased by 1.4 compared to the same period of the previous year.
