

Industrial production

November 2013

The index measures the monthly evolution of the volume of industrial production (excluding construction). With effect from January 2013 the indices are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In November 2013 the industrial production index seasonally adjusted increased by 0.3% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was +0.4.

The calendar adjusted industrial production index increased by 1.4% compared with November 2012 (calendar working days in November 2013 being 20 versus 21 days in November 2012); in the period January- November 2013 the percentage change was -3.1 compared with the same period of 2012.

The unadjusted index of industrial production decreased by 1.8% compared with November 2012.

Indices of industrial production (a). November 2013 (b)

Indices	Index (2010=100)	Percentage changes on the previous period		Percentage changes on the same period of the previous year	
		Nov 13	Sep 13-Nov 13	Nov 13	Jan-Nov 13
		Oct 13	Jun 13-Aug 13	Nov 12	Jan-Nov 12
Industrial production seasonally adjusted	92.2	+0.3	+0.4	-	-
Industrial production calendar adjusted	96.7	-	-	+1.4	-3.1
Industrial production not adjusted	94.1	-	-	-1.8	-3.4
<i>Calendar working days</i>	20				

(a) Excluding construction.

(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises; up until 2010 further revisions have been published every six months (on occasion of the press release of April and October). Since 2011 data are revised with a yearly occurrence on occasion of the press release of April.
