

Construction costs index for residential building

April 2014

The construction costs index for residential building approximates the monthly evolution of costs of the residential construction sector. Since January 2013 the indices are calculated with reference to the base year 2010.

In April 2014 the index remained unchanged compared with the previous month and decreased by 0.4% compared with April 2013.

Construction costs index for residential building. April 2014 (a)
