

## Large firms labour indicators

July 2014

Labour indicators for large firms (enterprises with 500 employees and more) are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In July 2014 the seasonally adjusted employment index in large firms decreased by 0.1% compared with June (-0.1 both in industry and in services); net of workers in cassa integrazione guadagni (Cig = short-time working allowance) is unchanged compared with June (unchanged also in industry in services). The percentage change of the average of the last three months compared to the previous three months was -0.2% gross of Cig and net of Cig.

The unadjusted employment index in large firms decreased by 0.8% compared with July 2013 (-0.5% net of Cig); the percentage change of the first seven months of the year with respect to the same period of 2013 was -1.0% (-0.7% net of Cig).

In July 2014 the seasonally adjusted index of gross average earnings per hours worked decreased by 0.6% with respect to the previous month (unchanged in industry and -0.8% in services). The percentage change of the average of the last three months compared to the previous three months was +1.1% (+1.3% in industry and +1.1% in services).

The unadjusted index of gross average earnings per hours worked increased by 0.7% compared with July 2013 (+2.3% in industry and -0.3% in services). The percentage change of the first seven months of the year with respect to the same period of 2013 was +1.8% (+2.5% in industry and +1.5% in services).
