

## Industrial production

January 2017

The index measures the monthly evolution of the volume of industrial production (excluding construction). With effect from January 2013 the indices are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In January 2017 the industrial production index seasonally adjusted decreased by 2.3% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was +0.5%.

The calendar adjusted industrial production index decreased by 0.5% compared with January 2016 (calendar working days being 19 versus 21 days in January 2016).

The unadjusted industrial production index increased by 5.7% compared with January 2016.

Indices of industrial production (a). January 2017 (b)

Indices	Index (2010=100)	Percentage changes		
		Jan 17 Dec 16	Nov 16-Jan 17 Aug 16-Oct 16	Jan 17 Jan 16
Industrial production seasonally adjusted	93.8	-2.3	+0.5	-
Industrial production calendar adjusted	88.0	-	-	-0.5
Industrial production unadjusted	88.3	-	-	+5.7
Calendar working days	19			

(a) Excluding construction.

(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises; up until 2010 further revisions have been published every six months (on occasion of the press release of April and October). Since 2011 data are revised with a yearly occurrence on occasion of the press release of April.
