

## Industrial production

July 2017

The index measures the monthly evolution of the volume of industrial production (excluding construction). With effect from January 2013 the indices are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In July 2017 the seasonally adjusted industrial production index increased by 0.1% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was +1.4.

The calendar adjusted industrial production index increased by 4.4% compared with July 2016 (calendar working days in July 2017 being the same as in July 2016); in the period January-July 2017 the percentage change was +2.6 compared with the same period of 2016.

The unadjusted industrial production index increased by 4.4% compared with July 2016.

### Indices of industrial production (a). June 2017 (b)

Indices	Index (2010=100)	Percentage changes on the previous period		Percentage changes on the same period of the previous year	
		Jul17	May17-Jul17	Jul17	Jan-Jul 17
		Jun17	Feb17-Apr17	Jul16	Jan-Jul 16
Industrial production seasonally adjusted	96.9	+0.1	+1.4	-	-
Industrial production calendar adjusted	110.9	-	-	+4.4	+2.6
Industrial production not adjusted	106.5	-	-	+4.4	+2.5
Calendar working days	21				

(a) Excluding construction.

(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises. Since 2011 data are revised with a yearly occurrence on occasion of the press release of April.
