

Large firms labour indicators

April 2013

Labour indicators for large firms (enterprises with 500 employees and more) are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In April 2013 the seasonally adjusted employment index in large firms decreased by 0.1% compared with March (-0.2% in industry and unchanged in services); net of workers in cassa integrazione guadagni (Cig = short-time working allowance) it decreased by 0.1% (-0.4% in industry and unchanged in services). The percentage change of the average of the last three months compared to the previous three months was -0.3% gross of Cig and -0.2% net of Cig.

The unadjusted employment index in large firms decreased by 1.4% compared with April 2012 (-1.3% net of Cig); the percentage change of the first three months of the year with respect to the same period of 2012 was -1.4% (-1.5% net of Cig).

In April 2013 the seasonally adjusted index of gross average earnings per hours worked decreased by 1.9% with respect to the previous month (+0.5% in industry and -1.9% in services). The percentage change of the average of the last three months compared to the previous three months was +0.5% (+0.8% in industry and -0.1% in services).

The unadjusted index of gross average earnings per hours worked decreased by 2.8% compared with April 2012 (-2.9% in industry and -2.7% in services). The percentage change of the first three months of the year with respect to the same period of 2012 was +0.7% (+0.4% in industry and +0.9% in services).
