

# MULTIPURPOSE DATA-ANALYSIS TO DETECT FIRM-LEVEL CAPABILITIES AND THEIR REACTIONS TO SHOCKS

Evidence from cross-countries studies

**ROME | 27th April 2023**

Sapienza University of Rome | Faculty of Economics

Via del Castro Laurenziano 9, Roma | Sala Lauree, 2nd floor, Palazzina della Presidenza

---

## ABSTRACT

The workshop aims at comparing the results obtained across countries in the detection and analysis of firms' organisational and productive strategies, using multi-purposes questionnaires. The integration of quantitative and qualitative information makes it possible to analyse broad research fields, from firms' reaction to economic crises to strategic investment plans, market strategies and the development of new inputs.

The workshop will also present two works carried out as part of the Istat-SSSA joint research project on "The links between performance and strategic-organisational choices of enterprises: measurement and analysis" which ended in autumn 2022.

The occasion aims to facilitate future moments of comparison and collaboration of international, institutional and academic experiences.

### *Program*

#### **14.30 Opening**

**Dario Guarascio** | Sapienza University of Rome

#### **14.40 Opening speech on Istat multipurpose data strategy**

**Monica Pratesi** | Istat

#### **14.50 Lecture: A capability-based theory of the firms**
