

## Industrial production

*January 2011*

The index measures the monthly evolution of the volume of industrial production (excluding construction). Since January 2009 the indices have been calculated with reference to the base year 2005 using the new Ateco 2007 classification (Italian edition of Nace Rev. 2).

In January 2011 the industrial production seasonally adjusted index decreased by 1.5% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was -0.1%

The calendar adjusted industrial production index increased by 0.6% compared with January 2010 (calendar working days being 20 versus 19 days in December 2010).

The unadjusted industrial production index increased by 3.8% compared with January 2010.

Indices of industrial production (a). January 2011 (b)

	Index (2005=100)	Percentage changes		
		Jan 11 Dec 10	Nov - Jan 11 Aug - Oct 10	Jan 11 Jan 10
Industrial production seasonally adjusted	87.6	-1.5	-0.1	-
Industrial production calendar adjusted	81.7	-	-	+0.6
Industrial production unadjusted	80.1	-	-	+3.8
<i>Calendar working days</i>	<i>20</i>			

(a) Excluding construction.

(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises; further revisions are published every six months (when February and October data are disseminated).
