

Construction costs index for residential building

II quarter 2011

The construction costs index for residential building approximates the quarterly evolution of costs of the residential construction sector. Since the first quarter 2009 the indices are calculated with reference to the base year 2005.

In the second quarter 2011 the index increased by 0.4% compared with the previous quarter.

The index rose by 3.3% compared with the second quarter of 2010.

Construction costs index for residential building. II quarter 2011 (a)

| | Percentage changes | |
