

Industrial production

July 2011

The index measures the monthly evolution of the volume of industrial production (excluding construction). Since January 2009 the indices have been calculated with reference to the base year 2005 using the new Ateco 2007 classification (Italian edition of Nace Rev. 2).

In July 2011 the industrial production index seasonally adjusted decreased by 0.7% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months decreased by 0.4.

The calendar adjusted industrial production index decreased by 1.6% compared with July 2010 (calendar working days being 21 versus 22 days in July 2010); in the period January- July 2011 the percentage change was +1.4 compared with the same period of 2010.

The unadjusted index of industrial production decreased by 4.6% compared with July 2010.

Indices of industrial production (a). July 2011 (b)

Indices	Index (2005=100)	Percentage changes on the previous period		Percentage changes on the same period of the previous year	
		Jul 11	May 11-Jul 11	Jul 11	Jan-Jul 11
		Jun 11	Feb 10- Apr 11	Jul 10	Jan-Jul 10
Industrial production seasonally adjusted	88.5	-0.7	-0.4	-	-
Industrial production calendar adjusted	98.4	-	-	-1.6	+1.4
Industrial production not adjusted	95.3	-	-	-4.6	+1.0
<i>Calendar working days</i>	<i>21</i>				

(a) Excluding construction.

(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises; up until 2010 further revisions have been published every six months (on occasion of the release of February and October). Since 2011 data will be revised with a yearly occurrence on occasion of the release of February.
