

Industrial production

September 2011

The index measures the monthly evolution of the volume of industrial production (excluding construction). Since January 2009 the indices have been calculated with reference to the base year 2005 using the new Ateco 2007 classification (Italian edition of Nace Rev. 2).

In September 2011 the industrial production index seasonally adjusted decreased by 4.8% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was -0.1.

The calendar adjusted industrial production index decreased by 2.7% compared with September 2010 (calendar working days in September 2011 being the same as in September 2010); in the period January-September 2011 the percentage change was +1.3 compared with the same period of 2010.

The unadjusted index of industrial production decreased by 2.7% compared with September 2010.

Indices of industrial production (a). September 2011 (b)

Indices	Index (2005=100)	Percentage changes on the previous period		Percentage changes on the same period of the previous year	
		Sep 11	Jul 11-Sep 11	Sep 11	Jan-Sep 11
		Aug 11	Apr 11-Jun 11	Sep 10	Jan-Sep 10
Industrial production seasonally adjusted	87.8	-4.8	-0.1	-	-
Industrial production calendar adjusted	92.5	-	-	-2.7	+1.3
Industrial production not adjusted	94.5	-	-	-2.7	+0.8
<i>Calendar working days</i>	22				

(a) Excluding construction.

(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises; up until 2010 further revisions have been published every six months (on occasion of the release of February and October). Since 2011 data will be revised with a yearly occurrence on occasion of the release of February.
