

Construction costs index for residential building

III quarter 2012

The construction costs index for residential building approximates the quarterly evolution of costs of the residential construction sector. Since the first quarter 2009 the indices are calculated with reference to the base year 2005.

In the third quarter 2012 the index is unchanged compared with the previous quarter.

The index rose by 2% compared with the third quarter of 2011.

Construction costs index for residential building. III quarter 2012 (a)

	Percentage changes
