

Construction costs index for residential building

February 2013

The construction costs index for residential building approximates the monthly evolution of costs of the residential construction sector. Since January 2013 the indices are calculated with reference to the base year 2010.

In February 2013 the index increased by 0.2% compared with the previous month.

The index rose by 1% compared with February 2012.

Construction costs index for residential building. February 2013 (a)
