

## Industrial producer prices

March 2013

The industrial producer price index measures the evolution of output prices for goods manufactured in Italy and sold on the domestic and non-domestic markets. Since January 2013 indices are compiled in the calculation base December 2012 and disseminated in reference base 2010.

In March 2013 the total producer price index has no variation with respect to the previous month; the index of producer prices shows no variation both on domestic market and non domestic market. The percentage change of the average of the last three months compared to the previous three months was -0.6% (-0.8% on domestic market and no variation on non domestic market).

The index decrease by 0.1% compared with March 2012 (no variation on domestic market and -0.4% on non-domestic market).
