

Industrial production

December 2013

The index measures the monthly evolution of the volume of industrial production (excluding construction). With effect from January 2013 the indices are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In December 2013 the industrial production index seasonally adjusted decreased by 0.9% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was +0.7.

The calendar adjusted industrial production index decreased by 0.7% compared with December 2012 (calendar working days in December 2013 being 20 versus 19 days in December 2012); in the average of 2013 the percentage change was -3,0 compared with the average of the previous year.

The unadjusted index of industrial production increased by 2.4% compared with December 2012.

Indices of industrial production (a). December 2013 (b)

Indices	Index (2010=100)	Percentage changes on the previous period		Percentage changes on the same period of the previous year	
		Dec 13	Oct 13- Dec 13	Dec 13	Jan-Dec 13
		Nov 13	Jul 13-Sep 13	Dec 12	Jan-Dec 12
Industrial production seasonally adjusted	91.3	-0.9	+0.7	-	-
Industrial production calendar adjusted	80.4	-	-	-0.7	-3.0
Industrial production not adjusted	80.0	-	-	+2.4	-3.0
<i>Calendar working days</i>	<i>20</i>				

((a) Excluding construction.

(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises; up until 2010 further revisions have been published every six months (on occasion of the press release of April and October). Since 2011 data are revised with a yearly occurrence on occasion of the press release of April.
