

## Industrial production

January 2016

The index measures the monthly evolution of the volume of industrial production (excluding construction). With effect from January 2013 the indices are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In January 2016 the industrial production index seasonally adjusted increased by 1.9% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was +0.2%.

The calendar adjusted industrial production index increased by 3.9% compared with January 2015 (calendar working days in January 2016 being 19 versus 20 days in January 2015).

The unadjusted industrial production index increased by 0.7% compared with January 2015.
