Industrial production

September 2016

The index measures the monthly evolution of the volume of industrial production (excluding construction). With effect from January 2013 the indices are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In September 2016 the seasonally adjusted industrial production index decreased by 0.8% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was +1.2.

The calendar adjusted industrial production index increased by 1.8% compared with September 2015 (calendar working days in September 2016 being the same as in September 2015); in the period January-September 2016 the percentage change was +1.1 compared with the same period of 2015.

The unadjusted industrial production index increased by 1.9% compared with September 2015.

INDICES OF INDUSTRIAL PRODUCTION (a). September 2016 (b)

INDICES	Index (2010=100)	Percentage changes on the previous period		Percentage changes on the same period of the previous year	
		Sep16 Aug16	Jul16-Sep16 Apr16-Jun16	Sep 16 Sep 15	Jan-Sep 16 Jan-Sep 15
Industrial production seasonally adjusted	93.8	-0.8	+1.2	-	-
Industrial production calendar adjusted	99.5	-	-	+1.8	+1.1
Industrial production not adjusted	100.8	-	-	+1.9	+1.0
Calendar working days	22				

(a) Excluding construction.
(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises. Since 2011 data are revised with a yearly occurrence on occasion of the press release of April.
