

Industrial production

November 2016

The index measures the monthly evolution of the volume of industrial production (excluding construction). With effect from January 2013 the indices are calculated with reference to the base year 2010 using the Ateco 2007 classification (Italian edition of Nace Rev. 2).

In November 2016 the seasonally adjusted industrial production index increased by 0.7% compared with the previous month. The percentage change of the average of the last three months with respect to the previous three months was +0.9.

The calendar adjusted industrial production index increased by 3.2% compared with November 2015 (calendar working days in November 2016 being the same as in November 2015); in the period January-November 2016 the percentage change was +1.3 compared with the same period of 2015.

The unadjusted industrial production index increased by 3.2% compared with November 2015.
